

TAKE A PICTURE OF YOUR STRUT

1. Circle your valve with a permanent marker

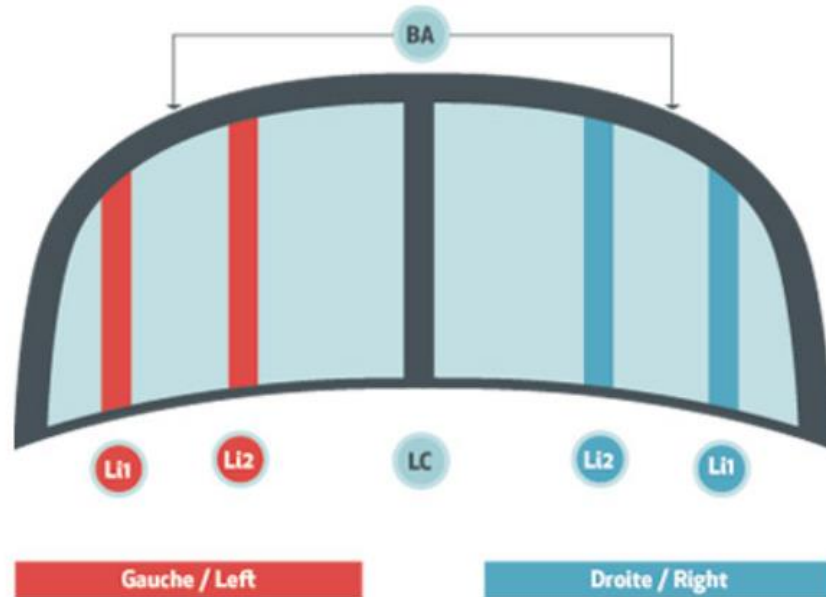

2. Put the strut flat on the floor and put a measure tape close to it (you can use also a ruler, be sure to indicate the length of the ruler)
3. Take a picture of the strut. Feel free to climb on a stool in order to have enough field of view. Be sure to stay plumb with the strut in order for the reproduction to be the best possible.

TAKE A PICTURE OF YOUR STRUT

4. Be sure that the picture is sharp so we can read the measures on the measuring tape zooming
5. When your pictures are done, please send them in the best quality possible
6. Send them to contact@wanikou.com precising the position of your strut (thanks to the scheme below), the brand, the year and the size of your kite .

For your information:

The drawing of the template can delay the production for a few days especially during peak season.
